

FAA Safety Team, EA-63 FSDO presents:

EAA 1310 Spring Fly-In, Two Part Safety Seminar & Cookout

In this two topic safety seminar, members of the 439th Airlift Wing will brief us collision avoidance and wake turbulence. Military aircraft share the airspace with civilian aircraft each day in the National Airspace System (NAS). In our area, C-5B Galaxys out of Westover Air Reserve Base fly daily. Collision avoidance in the air is one of the most basic responsibilities of a pilot flying in visual conditions. Just how do the flight crews of these military aircraft accomplish this? Wildlife and bird strikes occur every day all around the world. They are a very real hazards to all aircraft. FAASTeam Rep. and expert on avian risk hazard to aircraft, Gary Cooke will discuss this hazard and what we can do to minimize the risk. Breakfast will be served between 9-9:30 AM. A cookout will occur immediately after the seminar. Don't miss these exclusive seminars. Click on the link below and register TODAY.

Directions: Skylark Airpark is located 1/2 mile south of the CT-RT 140 intersection. Go to the EAA hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
